1**Shifting sands: behavioural change**

Nowadays, in some cultures there may often be confusion between generations about what is acceptable behaviour in certain situations. Older people sometimes complain, for example, about the real or imagined rudeness of others, such as in the use of electronic devices in public places. However, the younger generation do not regard electronic communication as intrusive, but rather as fundamental to their way of life. Only increased mutual understanding is likely to resolve potential conflict or confusion in any society. In this case, as in all others, it pays to be aware of other people's points of view.

Should we always aim to do what society expects of us? No, what society needs is individuality. Worrying about what other people think inhibits enthusiasm and creativity. Nothing new is ever achieved by conforming to expected social norms. This is not only true for society's innovators: everybody needs a strong sense of their own worth as an individual. This is essential for psychological well-being and the ability to function effectively in one's personal and professional life. Paying too much attention to society's conventions can be counter-productive in these and other ways.

Write your **essay**.
